User Management

Add toolbar button for User settings backup

With 2D Software it is possible to copy all User settings of a WinARace installation to a synchronizing directory, such as a server or a USB stick.

The upload to a server or USB stick can either be used as a backup functionality or to share/copy User settings to other PC.

Each time a 2D module is **read into WinIt** or the **setting is sent to the module via apply**, the current setting of the module is saved in a WinARace directory to ensure that it is always possible to step back to an older, correct setting of the module.

Documentation reference
For more information about backing up user settings please see the manual **User Management – Manual User settings backup** on our website:
http://2d-datarecording.com/downloads/manuals/

Documentation reference
For more information about integrating backed up User settings on a new PC please see the manual **User management – Integrating User settings** on our website:
http://2d-datarecording.com/downloads/manuals/

In this manual it is described how to add required toolbar button for User settings backup.

1. Open *WinARace* and open *Folders - Protocolls* folder via WinARace-Tab *Settings* and open *Application data directory* by clicking on the button with respective path

Further Information
Instead of opening *Folders – Protocolls* also shortcut [CTRL]+[ALT]+[D] can be used with *WinARace* opened!

2. Open *Toolbar.ini* with a text editor

3. Close **all** currently running 2D applications on your computer

Important information
It is very important to close all currently running 2D applications that the .ini-files are saved correctly at next steps!

4. Insert the following group after last existing [group] of *Toolbar.ini* and change number of inserted group **XX** to next value and change the **Race-version** to the currently used.

[PROGRAM_**XX**]

LinkName=2D_COPY_RACE_SETTINGS_TO_SERVER.BAT

OnlyEvent=0

CompleteEventPath=0

OnlyMeasure=0

CompleteMeasurepath=0

LoggerName=0

NewdataFormat=0

AdditionalParameter=<SETTINGSYNCDIR> <RACEVER> <APPDATADIR> <USERDATADIR> <DATADIR> "<RACEDIR>"

ShortCut=0

Sequential=0

SingleRunEachSelectedMeasurement=0

WaitForTermination=1

Comment=Copy Race-Settings TO Server#

IconLinkName=C:\ProgramData**Race2021** \System\Bilder\2D_Sync.bmp

5. Save and close *Toolbar.ini* file and open *WinARace* again

6. Check if the new toolbar button is added correctly.
